

SIMILDIEET

PIONEER IN NON TRAUMATIC TECHNIQUES

Simildiet, the laboratory precursor in the homeopathic mesotherapy world for body and facial treatments, presents therapeutic novelties with exclusive design which may be applied with the most modern electro-medicine techniques, specially the **Electroporation**.

As vanguardist designs, **Simildiet** provides to specialists the new Face Antiaging line as medical lifting treatment – facial cosmetic- and the complete Ion-Serum line for localised obesity, cellulite and flaccidity treatments. Both treatments may be applied through electromedicine techniques and specially, through Electroporation. They are also combinable among themselves, which allows to obtain a complete personalisation of the treatment, and provides quality and harmlessness. This makes them recommendable even for those patients who do not desire in their treatments any technique which could be scarcely traumatic (mesotherapy), or in specific innocuous and harmless treatments for children.

Simildiet attended, as every year, to the XVI Mediterranean conferences of Medicine and Cosmetic surgery, which were held in Sitges, from the 9th to 11th of May. There, the doctors who assisted appreciated our products and a practical demonstration of the application in patients.

With more than 15 years of experience, **Simildiet** continues developing and designing integral solutions for all the therapeutic possibilities within the Aesthetic Medicine. Always with the personality and the philosophy of total harmlessness, safety, and the total absence of undesirable side effects.
