

# LOCALM

## SIMILDIET

soothing solution

### DESCRIPTION

The main active principle of **LOCALM** is the TYR-ARG-PEPTIDE, it is a peptide for topic application with immediate neuromodulation properties.

The neurocosmetic action of Localm modulates the cutaneous perception reducing unpleasant feelings (pain, itching, stinging...) in the skin.

Neuropeptide – neuroregulator increases endorphins action and reduces other neuropeptides responsible for pain feeling.

Modulates cutaneous receptors against mechanic, thermic and chemical aggressions.

### COMPOSITION

Alcohol Denat., Buylene glycol, Aqua, Laureth 3, Hydroxyethylcellulose, Acetyl dipeptide-1, Cetyl ester.

The vehicle is cosmetic antiseptic (96° alcohol).

### PRESENTATION

300 ml HDPE bottle with spray.

100 ml HDPE bottle with spray.

### PROPERTIES

Reduces immediately the discomfort feeling in common mesotherapy techniques: Classic Mesotherapy.

Reduces unpleasant feeling of "stinging" and the afterwards burning.

Increases comfort feeling and smoothness in the skin.

### WAY OF USE

Spray one or two times a small quantity on the area to be treated. Perform the mesotherapy session immediately without removing the product.
